

Outbound Auto Dialing Features

There are a variety of ways Outbound Auto Dialing can function:

- 1) Deliver a message when the telephone is answered.
 - 2) Ask someone to press 1 before hearing the complete message.
 - 3) Ask for a voice response(s) after one or more messages or questions.
 - 4) Ask for a touchtone response(s) after one or more messages or questions.
 - 5) Transfer the call (using Centrex or 3-way calling) to a live operator immediately or after a message.
- The system can detect a live person vs. an answering machine.
 - You may record or listen to messages and information by telephone or by microphone and speaker, if you have Sound Blaster (or compatible) card.
 - Voice responses may be retrieved from any telephone with a pass code.
 - Outbound Auto Dialing may operate at the same time as the Inbound Auto-mated Attendant, if using separate telephone lines.
 - The system is capable of handling up to 12 telephone lines simultaneously.
 - Touchtone key responses may be stored in your computer for retrieval.
 - The time of day to begin and end calling may be set by the operator.
 - The system marks phone numbers that are busy, unanswered, & faxes.
 - The system will retry telephone numbers that were busy or unanswered, as many times as the operator requests.
 - The system will allow you to import databases of names and telephone numbers, or you may enter that information directly.
 - The system allows many different data bases (groups of phone numbers) to reside within the system at the same time.
